

# OFIA: Forensic Image Processing Workshop (Adobe Photoshop)

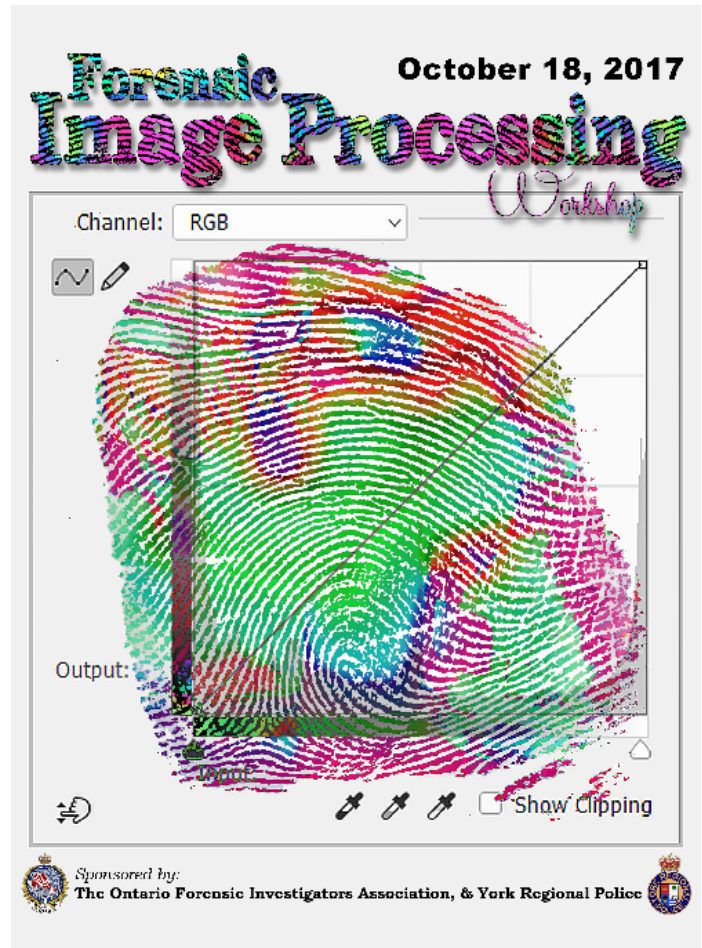

*Instructor: Jill Smith*

## Workshop Description:

This one-day workshop will introduce the attendees to digital strategies available for processing digital images intended for analysis using Adobe Photoshop software. Attendees will not only learn how to use the tools available in Photoshop, but will leave with an understanding of how they work.

Topics to be covered:

- Preparation of images for AFIS submission (calibration)
- Enhancement-Step tracking methods (maintaining image integrity)
- Introduction to colour modes and colour channel blending (minimizing distracting backgrounds)
- Introduction to Image Subtraction method (minimizing distracting backgrounds)
- Levels/Histograms, Curves, Shadow/Highlight, Sharpening tools (Contrast Adjustments)

## Attendee Requirements:

- Each attendee must bring their own laptop loaded with **Adobe Photoshop** (any CS version)
- It is beneficial for attendees to have some basic knowledge of Adobe Photoshop
