## Training Course

October 1 - 5

# Ontario, Canada

Durham Regional Police

2210 Bloor Street East, Clarington, Ontario L1C 0Z8

The five-day course is a complete indoctrination into vehicle forensics investigations. It covers the entire process of identifying, acquiring, and analyzing data from vehicle systems and how to use the iVe Ecosystem in the process.

### OVERVIEW

This course focuses on the full spectrum of vehicle forensics. It is structured to provide investigators with the necessary skills to identify, acquire, and analyze data from vehicle systems using iVe. The course starts with gaining a basic understanding of the available data and quickly moves from theory into practical exercises with vehicle disassembly and system removals.

During the course, each of the vehicle manufacturers and supported systems are covered. Investigators will work through the identification of the vehicles and systems, conduct hands-on acquisitions of the systems, learn troubleshooting techniques as well as learn how to analyze the data from each system. This is an active course with a large portion being hands-on acquisition exercises and practical data analysis exercises. Each part of the course builds on the next, increasing confidence through repetition.

### CERTIFICATION

At the conclusion of the course, attendees will be given the opportunity to sit for the iVe certification exam. Investigators who have successfully completed the five-day course and have passed the written and practical certification exams will earn the iVe Examiner Certification.

### WHO SHOULD ATTEND

Law enforcement, military, civil and regulatory agencies, academia and private sector investigators.

The course is appropriate for both technical and non-technical investigators.

### HOW TO REGISTER

Visit the Berla website to see a list of all upcoming training courses.

# COURSE SCHEDULE

---

## DAY ONE

### Introduction

- Infotainment & Telematics
- iVe Walkthrough

### Evidence Handling

- Best Practices for Handling Data Evidence

### System Identification

- Location & Removal
- Practical Exercise

## DAY TWO

### Vehicle Networks

- Overview of Network Types
- CANBus

### Ford Systems

- Navigation Radio Acquisition & Analysis
- Microsoft SYNC™ Acquisition & Analysis
- MyFord Touch Acquisition & Analysis
- Ford SYNC™ 3 Acquisition & Analysis
- Practical Exercise

## DAY THREE

### GM Systems

- Mylink™, Intellilink™, and CUE™ Acquisition & Analysis
- HMI, GA-130 and OnStar™ Acquisition & Analysis
- Practical Exercise

### Physical Acquisition Evaluation

## DAY FOUR

### BMW Systems

- CIC Acquisition & Analysis
- NBT Acquisition & Analysis
- Practical Exercise

### Mercedes-Benz Systems

- COMAND NTG™ 4.5/4.7 Acquisition & Analysis
- Practical Exercise

### SBC Acquisition Evaluation

### FCA Systems

- Uconnect™ 8.4A/8.4AN Acquisition & Analysis
- Uconnect™ 6.5 Acquisition & Analysis
- Uconnect™ 8.4/8.4N Acquisition & Analysis
- Practical Exercise

## DAY FIVE

### Toyota Systems

- Toyota Extension Box Acquisition & Analysis
- Toyota Touch & Go Acquisition & Analysis
- Practical Exercise

### Volkswagen Systems

- RNS 510 Acquisition & Analysis
- RNS 315 Acquisition & Analysis
- Practical Exercise

### Hyundai/Kia Systems

- Acquisition & Analysis
- Practical Exercises

### AUDI Systems

- MMI Acquisition & Analysis
- Practical Exercises

### Certification Exams

- Written Exam
- Practical Exam

Course schedule subject to change based on geographic brand availability and incorporating newly supported systems.
